```
const stateTree = {
 tasks: [
 { text: "Pickup Kids", completed: true },
 { text: "Buy Groceries", completed: false },
 { text: "Take Jimmy To practice", completed: false },
 { text: "Drop Jimmy off after practice", completed: false }
],
 newTask: "Clean the house",  // The current input for a new task
 filter: "non-completed", "all", "completed"  // Show non-completed , all, or completed tasks };
```

1. Tasks:
   - This is the array holding objects, each is a task
   - Each task contains
     - Text
     - Completed (true or false)
2. newTask
   - String showing the current user input for adding a new task
3. filter
   - "All" shows all tasks
   - "Completed" shows only completed tasks
   - "Non-completed" shows only incomplete tasks
